## Nursing and Rehabilitation therapy tailored to meet the needs of each patient

Sunshine Health & Rehab helps patients regain physical capacity following an accident, surgery, illness or stroke. Our skilled nursing and rehabilitation facility in the Spokane Valley specializes in short- and long-term treatment beyond what can be handled at home.

Sunshine’s facility and campus is active, with nature right outside the door. Rehabilitation programs managed by specially trained staff keep residents social

and active — engaged in art, celebrations, group discussions and more. Additional programs focus on restorative nursing and mental sharpness. Family members are always welcome to participate.

All care and treatment is tailored to meet each resident’s need, with the goal of gaining mobility, function and independence as soon as possible.

**If you or a loved one are considering surgery or need rehabilitation therapy, call or come by Sunshine Health & Rehab for a facility tour.**
